ETC5523: Blog Post 3 Instructions

Emi Tanaka

Self-reflection is an important part of the learning process. In this assessment, you will be writing a blog post about the Shiny app that you made for the previous assessment. In addition, you will be reviewing your app and offer points of improvement or additions you would like to make. This review should be written as a new blog post in your website. This blog post represents 5% of your final grade of ETC5523.

1. Continue using the same blog repo from your last assessment with a new blog post for this assessment and have a publicly accessible url. *(1 mark)*

2. Write a blog post containing:

   - A section introducing your shiny app and what it does *(2 marks)*
   - A section titled 'Self Review' considering the points below. *(6 marks)*
       - What did you do well?
       - What are the points you can improve on?
       - What are some things that you'd like to add that's plausible?
       - What are some things that you'd like to add that cannot be done yet due to limitation in data or technology?

3. Submit your **blog post url** (not your website url) to Moodle.

Marks will also take into account:

- how well the post is structured in terms of the narrative flow *(3 marks)*
- whether it is succinct with correct spelling, grammar and punctuation *(1 mark)*
- citations are accurate and consistent *(1 mark)*
- how visual appealing the website is *(1 mark)*
